.....

Knowing Your Child's “Blue Number”

This year, the Transportation department implemented a new route number system at the secondary level. Your student's bus now has a route number. This number was put in place to lessen the confusion for you and your student. The “blue number” is the route number for your child's bus. This blue number will remain the same no matter which bus is actually running the route on a given day. For example, your child may be picked up by bus 100 in the morning and dropped off by bus 101 in the afternoon. However, both buses will have the same blue number in the morning and afternoon. The blue number will be your child's daily route number. Any questions, please contact your child's school or transportation at (804) 469-4680.
