

## DCPS Literacy News

## What Families Need to Know

| What is the Virginia<br>Literacy Act?*              | The Virginia Literacy Act (VLA) is a new law starting in the 2024-2025 school year. It helps school divisions improve the teaching of reading and writing. The VLA provides teachers, families, and students the tools to guide teaching and support learning.  |
|---|---|
| How does the VLA<br>improve teaching<br>literacy?*  | One of the most important parts of the VLA is about how reading is taught. This year,<br>every student in kindergarten through grade 8 will be taught using the methods and<br>materials that years of research tell us are the best ways to teach reading. Teachers<br>of grades K-8 are receiving additional training on these methods, including our<br>Special Education, English Language Learning, and Resource teachers – even our<br>principals have been trained. Importantly, the VLA builds from what teachers and<br>schools are doing and ensures they have access to these materials and training<br>opportunities throughout the year. |
| What is the Science<br>of Reading?*                 | For more than 50 years, scientists have studied how our brains learn. <u>The Science of</u><br><u>Reading</u> is research that helps identify the best methods and strategies for teaching<br>children how to read.   |
| What core reading<br>curriculum is used in<br>DCPS? | Through the VLA, school divisions have seven options of core reading instructional programs for students in grades K-5. Dinwiddie County Public Schools (DCPS) uses Houghton Mifflin Harcourt (HMH) Into Reading Virginia.  |
| What are the<br>components of HMH<br>Into Reading?* | HMH Into Reading lessons focus on five different ways students learn reading and<br>writing. These lessons include writing practice, building foundational skills, reading<br>authentic literature, learning and practicing vocabulary, and flexible skill-based<br>groups.   |

| HMH: Reading and<br>Vocabulary*                                      | Students read books that capture their attention and teach them about the world.<br>Students have their own workbooks where they can read, respond to reading, and<br>write down their ideas and make connections. Teachers help students learn how to<br>make meaning of words they don't know. Expanding vocabulary increases reading<br>comprehension across all content areas.   |
|--|--|
| HMH: Knowledge<br>Building*  | Each HMH Into Reading module is based on a different science or a social studies<br>concept. This helps students learn more about topics that interest them and helps<br>them connect to learning they are doing in other subjects.  |
| HMH: Structured<br>Literacy,<br>Foundational Skills,<br>and Writing* | Students learn letter sounds, how to put sounds together to read words and how to<br>break sounds apart to spell words. Students learn how to spell words that have<br>regular or unusual spelling patterns. Students in upper grades learn where words<br>come from and how adding beginnings or endings to words can change their<br>meaning.<br>Teachers lead students through a step-by-step writing process. Daily practice and<br>feedback helps students become better writers. |
| What are flexible<br>skill-based groups?                             | Teachers, reading specialists, or reading interventionists provide students with<br>one-on-one or small group teaching. These small skill-based groups may change<br>daily or weekly depending on the needs of the students.   |
| What is Lexia?   | All students in grades K-5 have access to Lexia Core 5, a program built on the Science<br>of Reading. This is a research-proven program that accelerates the development of<br>literacy skills for students of all abilities, helping them make the critical shift from<br>learning to read to reading to learn. Students can access Lexia through their Clever<br>Portal.   |
| How do I know which<br>skills my child is<br>learning at school?     | Visit the <u>DCPS Parent Curriculum Site</u> . Click on your child's grade level, then English.<br>The <u>2024 VDOE English Standards of Learning</u> can also be found on this site.<br>Visit our <u>DCPS Literacy page</u> for more resources.   |
